

April 3, 2008

Dear publisher:

The research reported in this manuscript has been funded through the National Institutes of Health and therefore its publication must comply with Public Law 110-161 of the Consolidated Appropriates Act of 2008, which can be found in Division G, Title II, Section 218 of PL 110-161.

Specifically, the law states:

"The Director of the National Institutes of Health shall require that all investigators funded by the NIH submit or have submitted for them to the National Library of Medicine's PubMed Central an electronic version of their final, peer-reviewed manuscripts upon acceptance for publication, to be made publicly available no later than 12 months after the official date of publication: Provided, That the NIH shall implement the public access policy in a manner consistent with copyright law."

The NIH Public Access Policy, which implements this law, can be viewed at (<http://grants.nih.gov/grants/guide/notice-files/NOT-OD-08-033.html>).

In order to ensure compliance with the NIH policy, Montana State University, in cooperation with the author, must provide a copy of the author's final manuscript, including all modifications from the publishing and peer review process, to the NLM's PubMed Central (PMC) database at the time the manuscript is accepted for publication, and also authorize NIH to make such copy of the manuscript available in digital form for public access in PMC no later than 12 months after publication.

By accepting this manuscript, you agree to accept these terms and agree they are paramount and supersede any provisions in any publication agreement for this article, already signed or to be signed at a later date, that may conflict.

Sincerely,

Rebecca W. Mahurin, Ph.D.
Director
